Projects

Add to Cart
[https://github.com/udara885/add-to-cart]

A simple web application for manage list items like groceries. This application can save and delete list items Realtime using Firebase Realtime database. As well as can use as an Android or iOS mobile application by adding as a shortcut.

Technologies: HTML5, CSS3, JavaScript, Firebase

Lead Tracker
[https://github.com/udara885/lead-tracker]

A google chrome extension for add sales leads from URLs and via input, remove them when no longer require them.

Technologies: HTML5, CSS3, JavaScript, localstorage API

NFT Page

[https://github.com/udara885/nft-page]

A single webpage about NFTs with Responsive design.

Technologies: HTML5, CSS3

Tenzies Game

[https://github.com/udara885/tenzies-game]

In this game you have 10 dice with numbers (1-6). The roll dice button generate random numbers to the dice and you can hold a die by click it. When you hold a die it is not changing it's number for the button click. You need to match all dice with the same number to win.

Technologies: React

Markdown Notes App

[https://github.com/udara885/markdown-notes-app]

This app can take notes using markdown language and also you can preview what you are typing to the text area. The localstorage acts as the database for all the CRUD operations.

Technologies: React, localstorage API
